Ufuoma Jude Onohwosafe

SENIOR PHP / LARAVEL DEVELOPER | BACKEND ARCHITECTURE, APIs & INTEGRATIONS

Bucharest, Romania | +40 778 719 767 | judeufuomao@gmail.com
linkedin.com/in/jude-onohwosafe | github.com/jude4 | Portfolio: https://jude4.github.io/Judeverse/

PROFESSIONAL SUMMARY

Senior software engineer with **8 years of experience** building production applications and Laravel-based backend services across fintech, payments, trading, travel and utility platforms. Strong in PHP/Laravel architecture, REST API design, database queries, Redis caching, queues and webhooks. Experienced integrating third-party systems, debugging complex production issues, improving reliability and delivering tested features across backend and Vue/React frontends. Hands-on with Docker, AWS and CI/CD.

TECHNICAL SKILLS

Backend & Architecture: PHP, Laravel, Symfony, REST APIs, authentication, webhooks, queues, OOP, SOLID, DDD, CQRS, design patterns

Databases & Performance: MySQL, PostgreSQL, Redis, Eloquent ORM, Query Builder, SQL queries, schema restructuring, caching

Integrations & Reliability: Payment and travel supplier APIs, API scopes, idempotency, transaction workflows, failure handling

Testing & Delivery: PHPUnit, Pest, unit/feature/API testing, Git, GitHub Actions, CI/CD, Docker, AWS, Linux, Nginx

Frontend: Vue.js, Nuxt.js, React, Inertia.js, JavaScript, TypeScript, Tailwind CSS

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer | Techies Africa
Dec 2025 - Present

Remote | Lagos, Nigeria

- Build and maintain Laravel backend services and REST APIs supporting trading, inventory and supply-chain workflows.
- Develop PostgreSQL queries and Laravel Query Builder filters; investigate production failures across APIs, application logic and data.
- Integrate Laravel services with React/Vue frontends and work with Docker and AWS deployment environments.
- Contribute to Bellefest, a multi-sided vendor, farmer, logistics and customer platform, including authentication, product/service flows and orders.

Full Stack Engineer | Bex-IT Digital Solution
Sep 2024 - Nov 2025

Onsite | Abuja, Nigeria

- Delivered Laravel applications and REST APIs from business requirements through implementation and testing; built full-stack features with Inertia.js.
- Implemented data access and filtering with Eloquent and Query Builder; worked with MySQL, PostgreSQL and Redis caching.
- Introduced and maintained PHPUnit/Pest tests for backend logic, authentication, databases, APIs and third-party integrations.
- Refactored and debugged application code and improved Beezlinq user workflows with React and Nuxt.js.

Full Stack Engineer | Tiqwa Travel Technology
Jun 2022 - Aug 2024

Remote | Abuja, Nigeria

- Built Laravel REST APIs for flight/hotel search and booking, integrating external supplier APIs and travel inventory.
- Designed supplier-data processing flows and handled variable responses and failures to support reliable integrations.
- Implemented PHPUnit/Pest tests for booking and supplier workflows; delivered React/Vue functionality and worked with MySQL.

PROFESSIONAL EXPERIENCE (CONTINUED)

Software Engineer | VenturSeed Nov 2021 - Apr 2022
Contract, Remote | New York, USA

- Developed Laravel REST APIs and backend functionality for an investment platform, including user portfolios and financial transactions.
- Debugged and improved existing services and collaborated on API integration with Vue.js/Nuxt.js frontends.

Full Stack Developer | Cliff-Edge Networks May 2020 - Jul 2021
Freelance | Lagos, Nigeria

- Built maintainable PHP/Laravel backends, internal tools, REST APIs and automation scripts for client projects.
- Refactored and optimized existing applications and supported production maintenance and feature enhancements.

Full Stack Developer | Midtown Tech Hub Aug 2018 - Feb 2020
Hybrid | Benin, Nigeria

- Built and deployed Laravel, Vue.js and MySQL applications for clients.
- Produced technical documentation and system diagrams and supported testing, debugging and ongoing maintenance.

SELECTED PROJECTS & CONTRACT EXPERIENCE

Contract Full Stack Engineer | Cardplot
Cross-border payments and digital-wallet platform

- Contributed to Laravel 12 backend architecture, payment/wallet workflows and React/Inertia.js product features.
- Restructured PostgreSQL database components and improved queries; supported Docker/AWS infrastructure and GitHub Actions CI/CD.

Contract Backend Engineer | Flynt
Fraud infrastructure and B2B API product

- Built backend/API functionality for pseudonymization, API scopes and separate test/live environments.
- Implemented idempotency and reliability mechanisms to support safer API retries and backend processing.

Co-Founder | Utilify Networks
Utility payments platform | Nigeria

- Led PHP/Laravel backend development for airtime, data, electricity, wallet and transaction REST APIs.
- Implemented payment-status webhooks and Laravel queue-based background processing; used Redis and PostgreSQL for caching and transactional data.
- Created PHPUnit/Pest tests and debugged payment, integration and transaction-status issues; supported Laravel/Inertia.js features.

EDUCATION

MSc, Artificial Intelligence 2025 - Present
Politehnica University of Bucharest, Romania

BSc, Computer Science 2015 - 2019
University of Benin, Nigeria
